

KITCHEN REMODELING TIPS

Before you can enjoy your new kitchen, you have to handle the remodeling construction. In order to make the process as easy as possible, we invite you to take advantage of the great tips we've put together for you.

PLAN AHEAD:

1. Before the cabinets arrive—decide on a safe enclosed area for the cabinets and appliances to be delivered to. Usually the garage is a good location.
2. Decide in advance where you'd like the installers to store their tools.
3. Pack up the kitchen well before the remodel. While it's a great time to "spring clean" your shelves, don't forget to label the storage boxes well. This will make the unpacking process a lot easier and a lot more fun! Items that are fragile should be marked accordingly and stored in an area away from the construction.
4. Plan a location outside of the area where the remodeling is being done to act as your temporary kitchen.
5. In the weeks before the work begins, keep a list of all those restaurants you've been meaning to try. When the microwave gets old, your list will come in handy for a quick escape!

DON'T FORGET:

- The fridge!
- You may be able to temporarily move everything you need...except the kitchen sink! Consider where your "water source" will be in relation to your temporary kitchen.
- Microwave (and a freezer stocked with microwavable meals!)
- In a fond farewell to you old kitchen, spend some time in it, cooking.
- Coffee Maker (don't forget to put the filters and coffee close at hand too!)
- Utility utensils, such as can opener, bottle/wine opener, sharp knives, and microwavable dishes
- Toaster
- Keep the basics handy: butter, salt & pepper, favorite spices
- Dining area/table
- Tell the kids you're picnicking...use paper plates & napkins as well as disposable silverware.
- Cleaning supplies and dishtowels
- If it's a bathroom remodel, pretend you're packing to go on a trip. Remember the hairdryer and curling iron!
- Dust...there's just no way to avoid it! If there is a fish tank or electrical equipment in close proximity to the work – remember to keep them well covered!
- Don't forget about Fido & Kitty! If there isn't an area in your home to keep them safely away from construction, especially during certain phases - it maybe a perfect time to treat your pet to a vacation at the kennel or a play date at a friend's home.
