

THE PROCESS

We know remodeling your kitchen can be daunting—that's why we want to help walk you through all of our custom design process. We offer a completely transparent process that strives towards always making you feel secure and comfortable throughout your entire kitchen remodeling project.

Getting Started:

- Gather a scrapbook of notes, photos and articles that you have collected. This can be a physical scrapbook, a Pinterest board or your Houzz Ideabook.
- Get together with your immediate family and ask them for their input and wish lists.
- Come up with a budget you are comfortable investing.
- Draw a rough sketch of your floor plan and take measurements.
- If you would like, print and fill out our Custom Kitchen Planning Guide.
- Call us, request an appointment online, or stop by our showroom when you have time.

During Your Complimentary Consultation:

- We'll answer any questions you may have.
- Review and/or assist you in establishing a budget.
- Discuss your scrapbook of ideas.
- Examine your existing floor plan and what you want to change.
- Discuss your ideal functionality for your kitchen and go over some design ideas.
- Establish a budget range.

When You're Ready to Start Working with Us:

- We'll come to your home and take measurements.
- Our custom design experts will create a design, and draft perspectives, plans, elevations and a floor plan to meet your needs.
- An initial investment to start work would be required for further designs and drawing to continue.
- The next meeting is for you to refine the designs and any potential changes you would like to make, giving you design flexibility.

The Installation Process:

- We will make arrangements with your builder, architect and/or designer to coordinate the installation, if necessary.
- We will help you arrange to have your existing cabinetry and appliances removed, if needed.
- We will install the cabinets and counter tops with a warranty, or give you the flexibility to choose your own installer.
